PREMIUM ADHESIVES, SEALANTS & CLEANERS
Engineered for Performance. Proven on Site

WHERE DIFFERENCE BEGINS

DO IT ONCE. DO IT WITH TEC7

High-performance adhesives, sealants, and cleaners designed for professionals who expect it to hold, seal and last.

About TEC7

Built on European engineering excellence, TEC7 products have been trusted by trades, builders, and industry professionals worldwide since 1989, delivering reliability, durability, and versatility on every job.

Designed to make life easier on site, the TEC7 range is engineered to simplify installation, improve quality, and give professionals confidence across the full scope of their work.

Today, Tec7 is a global leader in sealing, bonding, mounting, and cleaning, trusted by specifiers, architects, trades and DIYers alike.

To keep Tec7 at the forefront, the latest evolution—nTec Polymer Technology takes performance even further. Developed by Tec7's in-house scientists, it delivers faster strength build-up, superior adhesion across more materials, and long-term flexibility, along with sub-zero drying capabilities setting a new benchmark for reliability on modern job sites.

Tec7

Glue, mount & seal even under water

- Incredible bonding capacity of 38kg/cm²
- Adheres to both wet and dry substrates
- High UV, fungus and bacteria resistance
- After curing, strong and permanently elastic
- Free of phthalates, solvents and isocyanates
- Safe on mirrors, no markings on natural stone
- 100% water tight mounting & paintable
- Global GreenTag Certified

Sealing, even in wet conditions, caulking, signage, adhering in horizontal applications, installation of supported mirrors, splash-backs, timber panels, aluminium composite panels etc. Tec7 can be painted over as soon as it skins off.

Available colours & packages:

Tec7 black - cartridge 310ml - Sausage 600ml

Tec7 white - cartridge 310ml - Sausage 600ml

Tec7 grey - cartridge 310ml - Sausage 600ml

nTec[®]
POLYMER
TECHNOLOGY

**THE NEW GENERATION
MS HYBRID POLYMER TECHNOLOGY**

BETTER

Improved adhesion on a wide range of substrates
Enhanced elastic recovery for long-term flexibility
Greater resistance to bacteria and mould

FASTER

2-4x faster curing time
Performs reliably in extreme conditions

STRONGER

Higher adhesion strength
Built for tough, long-lasting results

+40°C
-10°C
Application

380 kg/10cm²
Tensile strength

3-6 h
Hand-tight

350%
Elasticity

On damp surfaces
Even under water

Most Building
materials

Instantly
Paintable

Indoors and
outdoors

X-Tack

Extreme mount. No screws-just glue

- Extreme initial strength - 600kg/m2 instantly
- Vibration and impact-resistant
- Perfect for vertical bonding
- Odourless and solvent free
- 100% watertight mounting and paintable
- Global GreenTag Certified

X-Tack is the only instant grab adhesive you will need. Fast simple installation of unsupported mirrors, splash-backs, tiles, timber panels, aluminium composite panels, bathroom fixtures, signs, individual letters, conduit, down pipes, sinks and more.

Available colours & packages:

X-Tack black - cartridge 290ml

X-Tack white - cartridge 290ml

X-Tack grey - cartridge 290ml

Trans Clear

Crystal clear universal sealing adhesive

- After curing, super strong and permanently elastic
- Free of solvents and isocyanates
- Safe on mirrors and leaves no markings on natural stone
- Almost odourless
- Can be used on wet substrate
- Fungus and bacteria resistant
- 100% water tight
- Global GreenTag Certified

Trans Clear has multiple applications in the building and construction industry, air conditioning, window framing, sanitary and general maintenance areas. Trans Clear can also be painted over as soon as it skins off.

WHERE PERFORMANCE

MEETS SUSTAINABILITY

Tec7 products are manufactured with a strong commitment to sustainability and environmental responsibility, ensuring that progress never comes at the expense of the planet or its people.

Over the past decades, research has shown that the toxicity of building materials can have a very real impact on human health. We understand that true sustainability goes deeper than what meets the eye and believe that adhesives and sealants shouldn't be an exception - resulting in Tec7 taking steps to make products safer and more environmentally friendly.

Tec7 certified products are designed to perform reliably for decades, and we recognise the lasting impact they have on people, animals, and the environment. Our commitment is to provide Australian customers with access to products that enable environmentally conscious choices — without compromising on quality, safety, or performance.

THE FUTURE OF CONSTRUCTION IS GREEN

Green Star® Credits, LEED® Credits and WELL™ Features can be earned when working with Green Building rating systems and Tec7 certified products.

Achieve

Sustainable procurement

Demonstrate

Responsible material selection

Strengthen

Material transparency submissions

HIGH PERFORMANCE. LOW IMPACT

Adhesives and sealants are typically used in large quantities for construction or interior design projects, and yet they can also be one of the most commonly overlooked materials in terms of their sustainability credentials.

LESS WASTE. MORE EFFICIENCY

Switch to 600ml sausages
Cut waste by 90%.

Tec7 Certifications

X-Tack Certifications

Trans Clear Certifications

TEC7 has undergone Global GreenTag's rigorous assessment for ethical manufacturing, health, safety, and eco performance, earning a PlatinumHEALTH™ HealthRATE™ outcome through a Global GreenTag PHD™ (Product HealthDeclaration™).

Additionally, TEC7 has been assessed for compatibility with the FEICA model EPD (Environmental Product Declaration) for polyurethane or silane-modified products in Group 1, ensuring its Life Cycle Assessment data is applicable for building assessments.

Tec7 Cleaner

Universal cleaner & degreaser

- Ideal for surface preparation prior to using Tec7 adhesives
- Finishing off Tec7 adhesive & sealant joints on non porous or smooth surfaces
- Removes uncured Tec7 adhesives & sealants
- Removes sticker/adhesive residues

Tec7 cleaner is a fast and safe way to degrease ferrous and non-ferrous metals before bonding or painting. Ideal to use when preparing surfaces prior to using adhesive and sealant products, removal of adhesive residues, degreasing and cleaning of tools and machines.

Available packages: 500ml aerosol

Prepare & Finish

The perfect preparation & finish for adhesives & sealants

- Cleaning, degreasing and finishing of joints
- Prepare & Finish is pH neutral reducing the risk of staining or damaging sensitive surfaces
- It accelerates the curing of polymers and reduces the risk of mould growth on sanitary joints
- Contains no propellants, is biodegradable and non-toxic
- Can be painted over without rinsing
- Convenient and highly efficient packaging due to Bag-on-Valve technology. Prepare & Finish is not diluted with propellants resulting in the product being applied in its most pure form, in addition the Bag-on-Valve technology leaves almost no wasted product
- Compatible with MS polymers, silicones, acrylic sealants and PU adhesives

Prepare & Finish is compatible with every type of adhesive or sealant.

Cleaning and degreasing with Prepare & Finish removes fine dust, grease and finger marks ensuring a perfectly prepared surface for bonding or sealing. A flawless finish is achieved when tooling off joints with Prepare & Finish, almost no product goes to waste due to Prepare & Finish's unique packaging.

Available packages: 400ml bag on valve aerosol

Multiclean

All purpose foaming cleaner

- Quick and safe to use with visible foaming effect
- Ideal for surface preparation
- Contains no abrasives
- Dries quickly
- Pleasant odour

Multiclean leaves no traces, smears or marks on surfaces and safely and easily removes natural contaminations. Ideal for horizontal, vertical and over head applications.

Multiclean is safe to use on a wide range of materials and is ideal for cleaning and degreasing kitchens, bathrooms, offices, furniture, imitation leather, hard synthetic materials, stainless steel, enamel, plastic, formica, tiles, mirrors, windows, doors & can even be used on textiles.

Available packages: 500ml aerosol

KEEP SURFACES FLAWLESS

A SIMPLE & EFFECTIVE KIT

Designed to enhance your customers' experience with their new kitchen installation, keeping surfaces looking flawless from day one.

Dark kitchens look stunning — but handprints can quickly ruin the effect. After seeing customers struggle to keep their new kitchens looking pristine, we created the **Tec7 Universal Cleaning Kit**. Designed specifically for modern kitchen finishes, it provides the ideal solution to remove marks and maintain that just-installed look.

Includes: 500ml Multiclean aerosol x2 Microfibre Cloths and x2 Clean Gum Soft Melamine Sponges

HP Clean

Water based cleaner with deep cleaning effect

- Solvent and acid free, safe on most materials
- Highly concentrated cleaner and degreaser that removes unpleasant odours and natural pollutants
- Non flammable
- Skin friendly and biodegradable
- Tool off Tec7 adhesives & sealants for seamless joints on smooth & porous surfaces

HP Clean produces a strong penetrating effect which lifts the dirt.

An anti-corrosion additive reduces the risk of rust, which is typical of most water-based cleaners.

Always rinse with water and dry the surface.

Available packages: 1 & 5L bottles

Microfibre Cloth

Streak-free cleaning

Polishes, buffs and shines
Removes soiling without scratching
Machine washable

Ideal for use with Tec7 cleaners, they are ultra absorbent, machine washable and eco friendly.

Available packages: 5 Pack

Powerwipes

Cleaning wipes for extreme soiling

- Non-woven textile: strong material charged with a powerful cleaner
- Fast acting
- Contains glycerine - gentle on hands

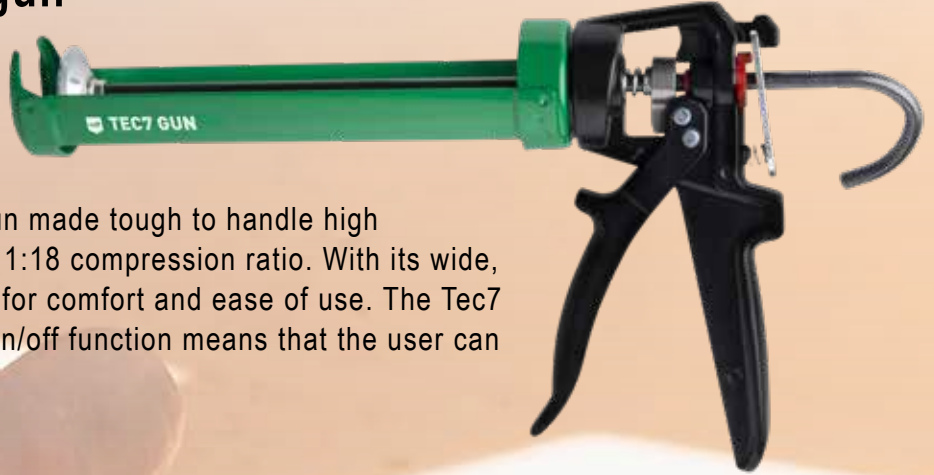

Powerwipes are safe and effective on equipment, tools, machinery, and even for use on hands to remove grease, oil or paint. They are also ideal for non-hardened PU-foam, resins and artificial resins, silicones, adhesives, sealants, oils, greases, nicotine, tar spots, diesel deposits, and are effective in removing graffiti on smooth surfaces.

Available packages: 70 piece pail

Tec7 cartridge caulking gun

High quality caulking gun

The Tec7 Gun is a premium quality gun made tough to handle high viscosity products due to its massive 1:18 compression ratio. With its wide, rounded hand grip it's been designed for comfort and ease of use. The Tec7 Guns automatic no-drip system with on/off function means that the user can customise the gun to their needs.

Tec7 sausage caulking gun

Easy application of sausage adhesives & sealants

The Tec7 1:12 compression ratio sausage gun can be used for most products in sausages, regardless of viscosity. The flow stop control switch offers two possibilities, down for continuous pressure, up for a slight regression of the piston to obtain a smoother and slower pouring of softer products.

We only recommend using Tec7 caulking guns or a high quality electric caulking gun with all Tec7 adhesives.

Available packages:

Cartridge gun 10 units per carton

Sausage gun 10 units per carton

Perfect Finish

High quality toolset for finishing sealants

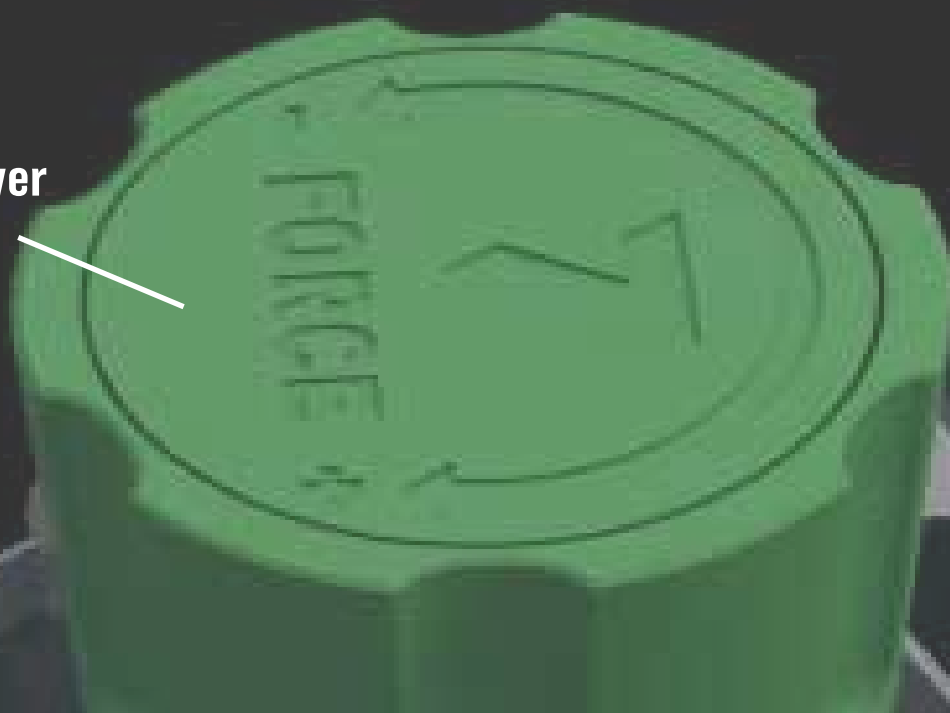

Perfect Finish is a handy set of finishing tools. It includes four durable smoothing tools crafted from high-quality silicone rubber, making them compatible with all types of sealant. Designed with both radius and straight-edge smoothing tools, it ensures flawless, clean lines every time, whether you're working on tight corners or long, even surfaces.

Power You Control

Fully adjustable pump power

From 1:12 to 1:25 ratio

Tec7 Multigun

Cartridge gun with adjustable power transmission

- Stepless power setting from 1:12 to 1:25
- For light sealants and heavy adhesives in standard tubes
- Ergonomic lightweight design
- Rotatable tube holder

The Multigun caulking gun not only simplifies your finishing jobs, it also makes getting started quick and effortless. The gun has an ergonomic lightweight design that relieves your fingers and wrists, a rotating stock to position the nozzle in the optimum position, and offers an infinitely variable power setting from 12:1 to 25:1. In this way, sealing or adhesive bonding is effortless and precise. You will benefit from this ease of use year after year, because the Multigun is made of high-quality materials for a long service life. The strong aluminum frame and the treated steel connecting rod with suspension hook are proof of this.

LUBRICATE & PROTECT

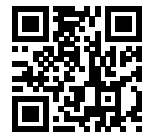

GT7

Unique Multi-spray. More than just a lubricant

- Penetrating oil
- Repels moisture
- Fights rust
- Lubricates
- Is a contact spray
- Cleaner and protective agent

GT7 is the next generation in multispray that is more than just a penetrating oil. GT7 solves thousands of problems in both domestic and industrial situations. GT7 detaches oxidation and is the ideal spray on electrical appliances, household devices, battery terminals, distribution boxes, etc, due to its strong penetrating capacity. It fights rust in the shortest time due to its unique cold shrink effect which cracks and breaks up rust particles. Cleans, protects and lubricates chainsaws, mowers, hedge and garden shears. Internal and external protection against moisture of power and battery operated tools, along with machinery.

Available packages: 600ml aerosol with cobra nozzle

REPAIR

Filler

Super light elastic finishing plaster

- Ready to use
- For indoor and outdoor use
- Keeps for a long time, even after having been opened frequently
- Can be painted over quickly
- Remains flexible

Tec7 Filler with its grain-free structure is easy to spread. It cuts down on sanding and provides a super fine result when filling holes, tears, joints in walls and ceilings, plaster, stucco, gypsum, wood, soft and hard board, stone, limestone and porous concrete along with most porous construction materials.

Available packages:

Tec7 Filler - 750ml

Tec7 Filler - 5L

Seal and Bond Special Primer

Improves adhesive bonding strength

- Ideal for PP, PE, ABS, powder coatings, painted surfaces
- Transparent and invisible after rapid drying
- Does not leave traces or stains
- Fast and easy to apply

Seal and Bond Special Primer assists in achieving a higher bond on synthetic materials, powder coatings and paints. After just +/- 10 mins gluing is possible. Seal & Bond Special Primer is applied directly to the substrate that needs to be glued and is ideal for bonding MS Polymers, silicones, sealants, tapes and paints as it improves surface adhesive bonding strength.

Available packages: 400ml aerosol

Clean Gum Soft

Melamine sponge for removing stubborn grime

When moistened clean gum soft becomes like fine sand paper allowing it to loosen even the toughest dirt and grime. Clean gum soft works on various surfaces; wood painted surfaces, leather, glass, ceramic and plastic. It can be washed in warm water and reused many times.

Available packages: 10 pack

Al-Fix Gel

Super fast colourless filling gel

- Bonds in seconds
- No heating, soldering or mixing
- High tensile sheer strength - shows no shrinkage
- Very economical - the thinner the adhesive, the stronger the joint
- Resistant to solvents, oils and benzene
- Based on ethyl cyanoacrylate monomer

Novatio's Al-Fix Gel is an adhesive that bonds in seconds. A one component adhesive which is ideal for small signage and letters, along with other small commercial and residential repairs. Al-Fix Gel is temperature resistant from -30 degrees celsius to +100 degrees celsius and can be used on a wide range of products (Please refer to TDS for full details).

Available packages: 20ml tube
